

Transforming Static Content into Dynamic, Personalized Learning Journeys.

Lumina AI fuses trusted “Gold Standard” curriculum with immersive, AI-powered “Pro” generation to create learning experiences that adapt to every individual.

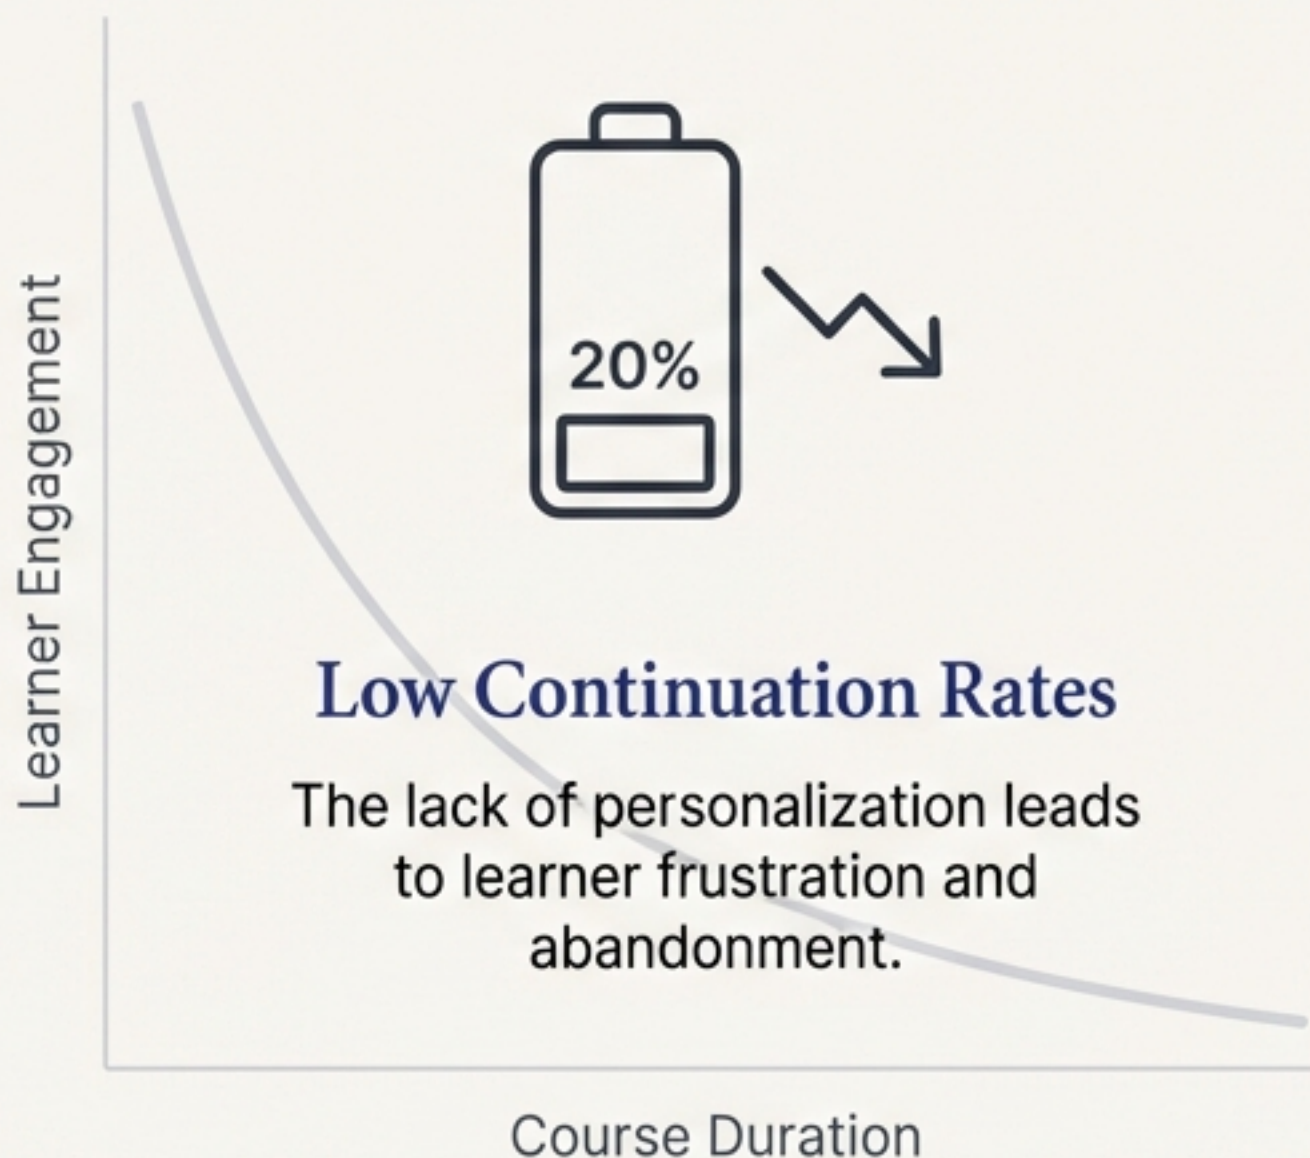

Today's Online Learning is Broken: A Crisis of Engagement.

Existing Learning Management Systems (LMS) are built on a one-size-fits-all model, leading to low engagement and high drop-off rates. They fail to adapt to the individual.

Uniform & Impersonal

Curricula are static and fail to account for individual learning styles, goals, or personality traits.

Low Continuation Rates

The lack of personalization leads to learner frustration and abandonment.

Inaccessible for Communities

A significant gap exists for affordable, high-quality, and easy-to-deploy learning platforms for community hubs like youth centers and third places.

The Human Cost of Inflexible Learning.

The Aspiring Learner

"I'm trying to learn a new skill, but generic courses don't match my pace or my goals. I lose motivation quickly because the content doesn't feel relevant to me."

The Community Leader

"I run a community center for kids. I need accessible, high-quality educational tools that are easy to manage and engaging for diverse groups, but professional solutions are too expensive and complex."

The Solution: A Smarter, More Human Way to Learn.

Lumina AI is a next-generation platform that addresses the core failures of traditional LMS with three foundational pillars.

1. Deep Personalization

We go beyond simple progress tracking. Our AI optimizes curriculum based on Big5 personality traits, ensuring the content and format resonate with each learner's unique profile.

2. Assured Quality & Trust

We eliminate 'black box' AI. A 3-stage human-in-the-loop approval process (Requirements → Roadmap → Curriculum) ensures every course is accurate, logical, and trustworthy.

3. Grounded & Transparent Generation

Our content is built using Retrieval-Augmented Generation (RAG), ensuring all information is based on source material, with citations preserved for verification.

How It Works: From Idea to Immersive Course in Three Steps.

1. Input & Define

The user provides a topic or uploads source materials. Our AI Concierge engages in a dialogue to understand their specific requirements.

2. Review & Approve

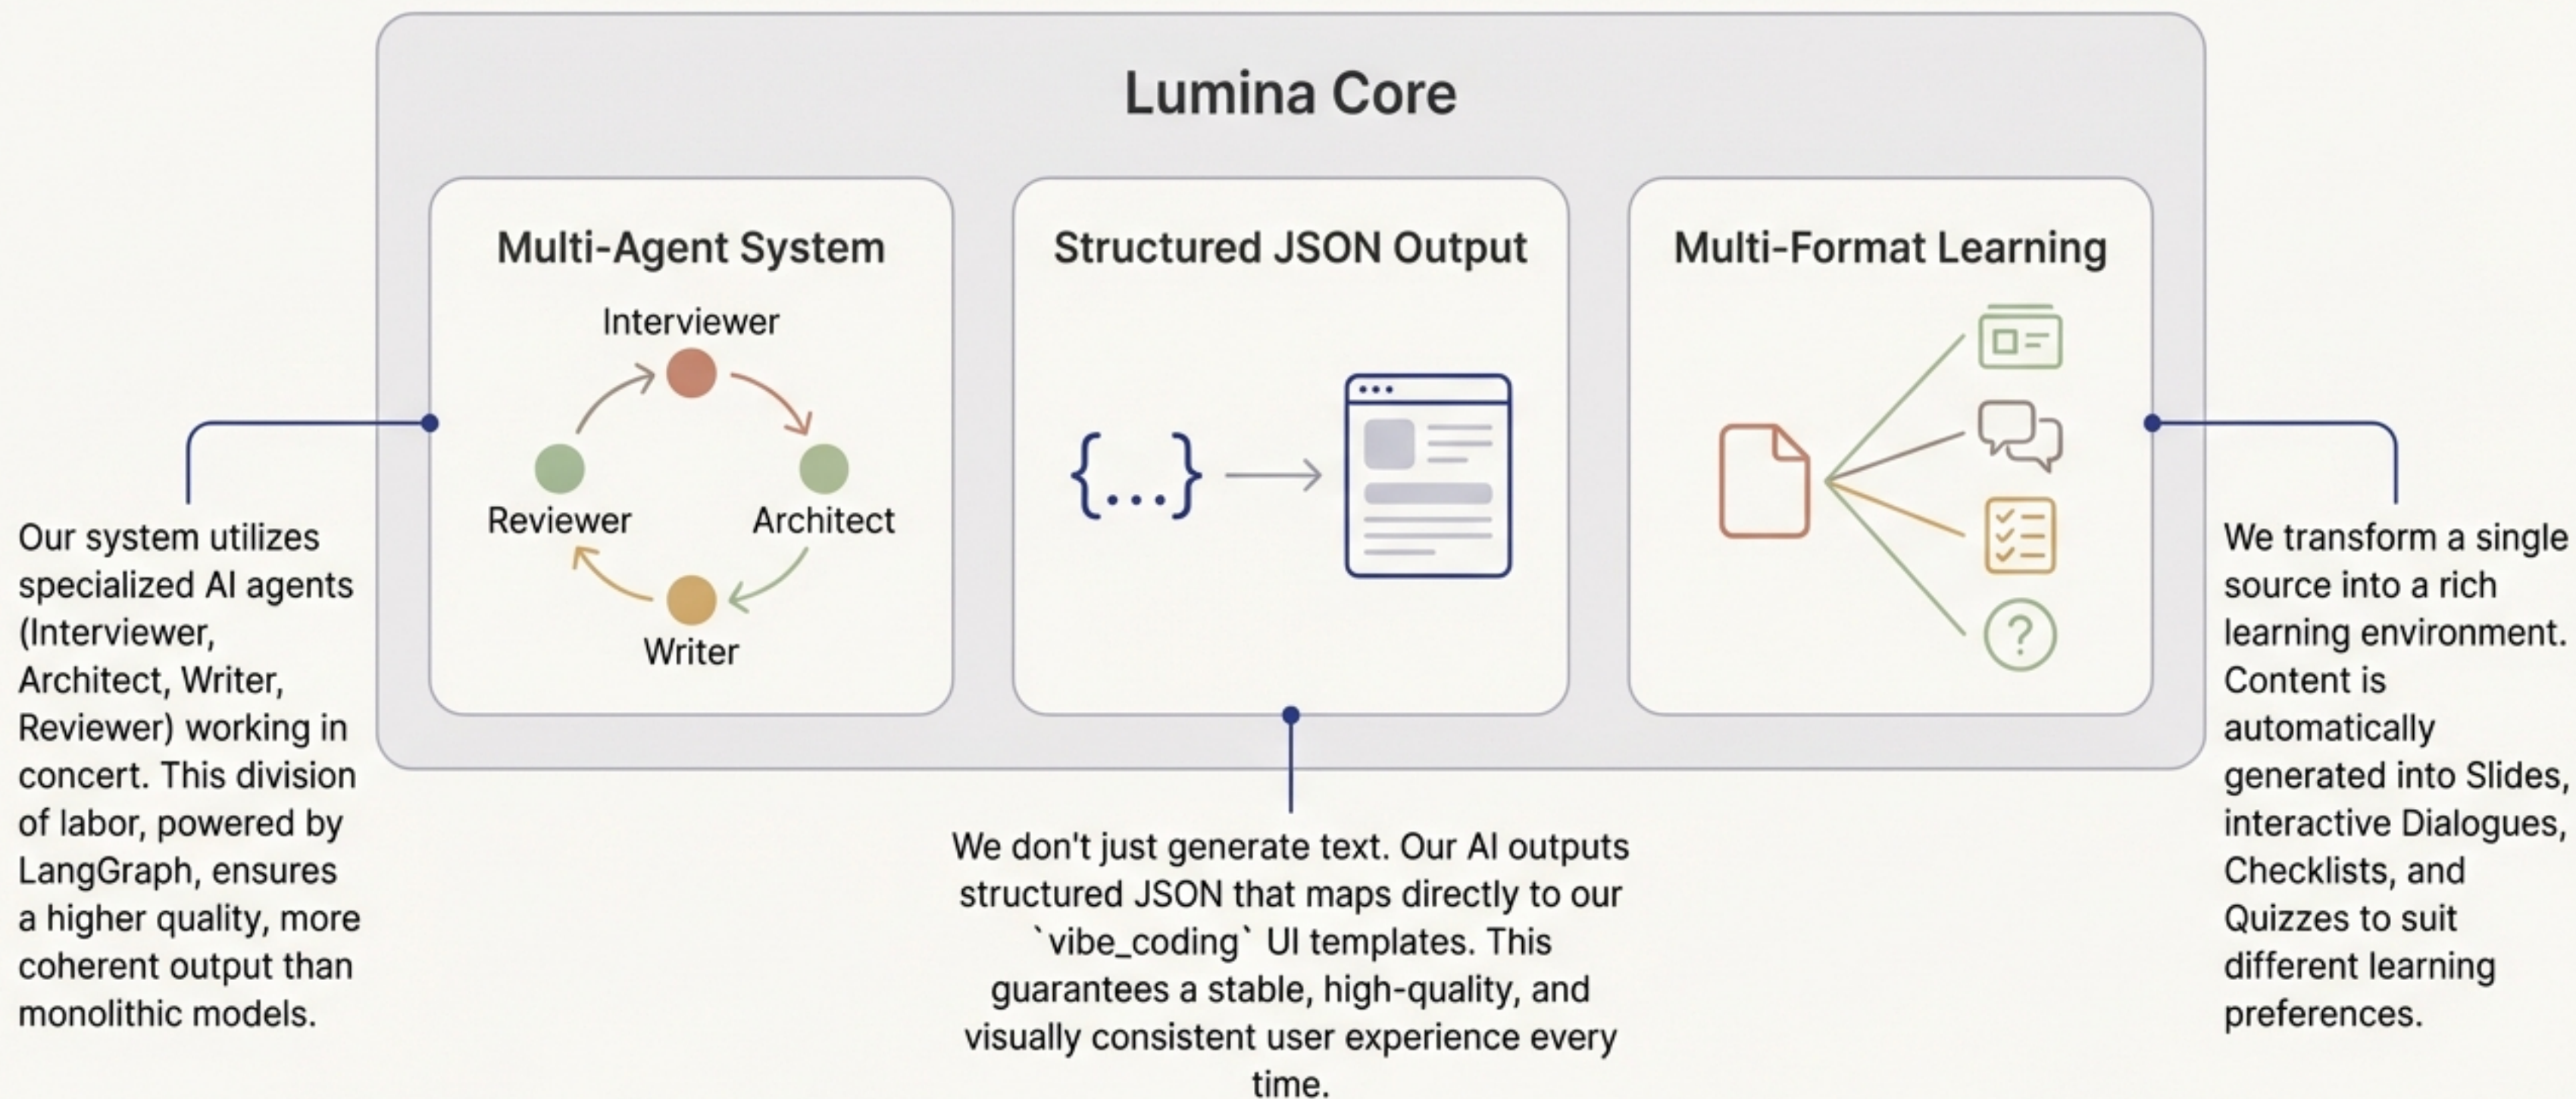

The AI generates a course structure in three phases: Requirements, Roadmap, and Curriculum. The user approves each stage, ensuring full control and satisfaction with the final output.

3. Experience & Learn

The approved course is instantly generated into an interactive, multi-format experience in our Lesson View, ready for learning. The structured JSON output ensures a polished UI every time.

The Lumina Difference: Our Technology Core.

Proof in the Real World: We're Already Live and Learning.

Live Since February: Actively used in 2 community centers in Osaka.

- **MVP Complete:** A robust and functional platform is already built.
- **Core Tech Implemented:** Our full pipeline is operational, including the LangGraph multi-agent system, RAG, database synchronization, and the 3-stage approval workflow.
- **Domain Agnostic:** Proven flexible enough to generate high-quality courses across diverse domains including Blender, Unity, Art, and Programming.

Tech Stack

- 🌸 **Frontend:** React 19, Vite, TypeScript
- 💻 **Backend:** Node/Express, LangGraph
- 🗄️ **Data:** Postgres (with optional pgvector)
- 🌟 **AI:** Google Gemini

Our Business Model: Scalable, Flexible, and Community-Focused.

We have two primary GTM motions with a blended revenue stream of subscriptions, usage-based credits, and corporate sponsorship.

B2C (For Individual Learners)

Plan	Price/mo (USD)	Key Features
Free	\$0	1 course/mo, 1 RAG source
Starter	\$5	2 courses/mo, 3 sources, history
Standard	\$10	5 courses/mo, 10 sources, TTS
Pro	\$20	12 courses/mo, 30 sources, Pro model

Community / Facility (B2B2C)

Plan	Price/mo (USD)	Learners	Credits
Community Free	\$0 (Sponsored)	<= 20	50
Community Start	\$49	<= 80	400
Community Plus	\$149	<= 250	1500
Network	\$299	<= 5 sites	3000

Add-on Credits: \$10 for 120 credits.

Our Path to Scale: The 12-Month Execution Plan

Successfully operate and gather data from the 2 Osaka pilot sites.

Operationalize the RAG ingestion pipeline for seamless content integration.

Phase 1: Months 0-3

Pilot Validation & Foundation

Launch the full multi-format learning experience (Slides, Dialogues, etc.).

Integrate Text-to-Speech (TTS) and audio synchronization features.

Phase 2: Months 4-6

Product Enrichment

Full rollout of B2C subscription plans.

Implement the credit-based system for generation and advanced features.

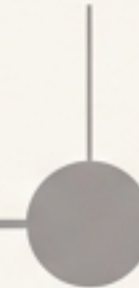

Phase 3: Months 7-9

Monetization & Growth

Scale the Community/B2B2C offering to new partners.

Expand the library of high-quality course templates.

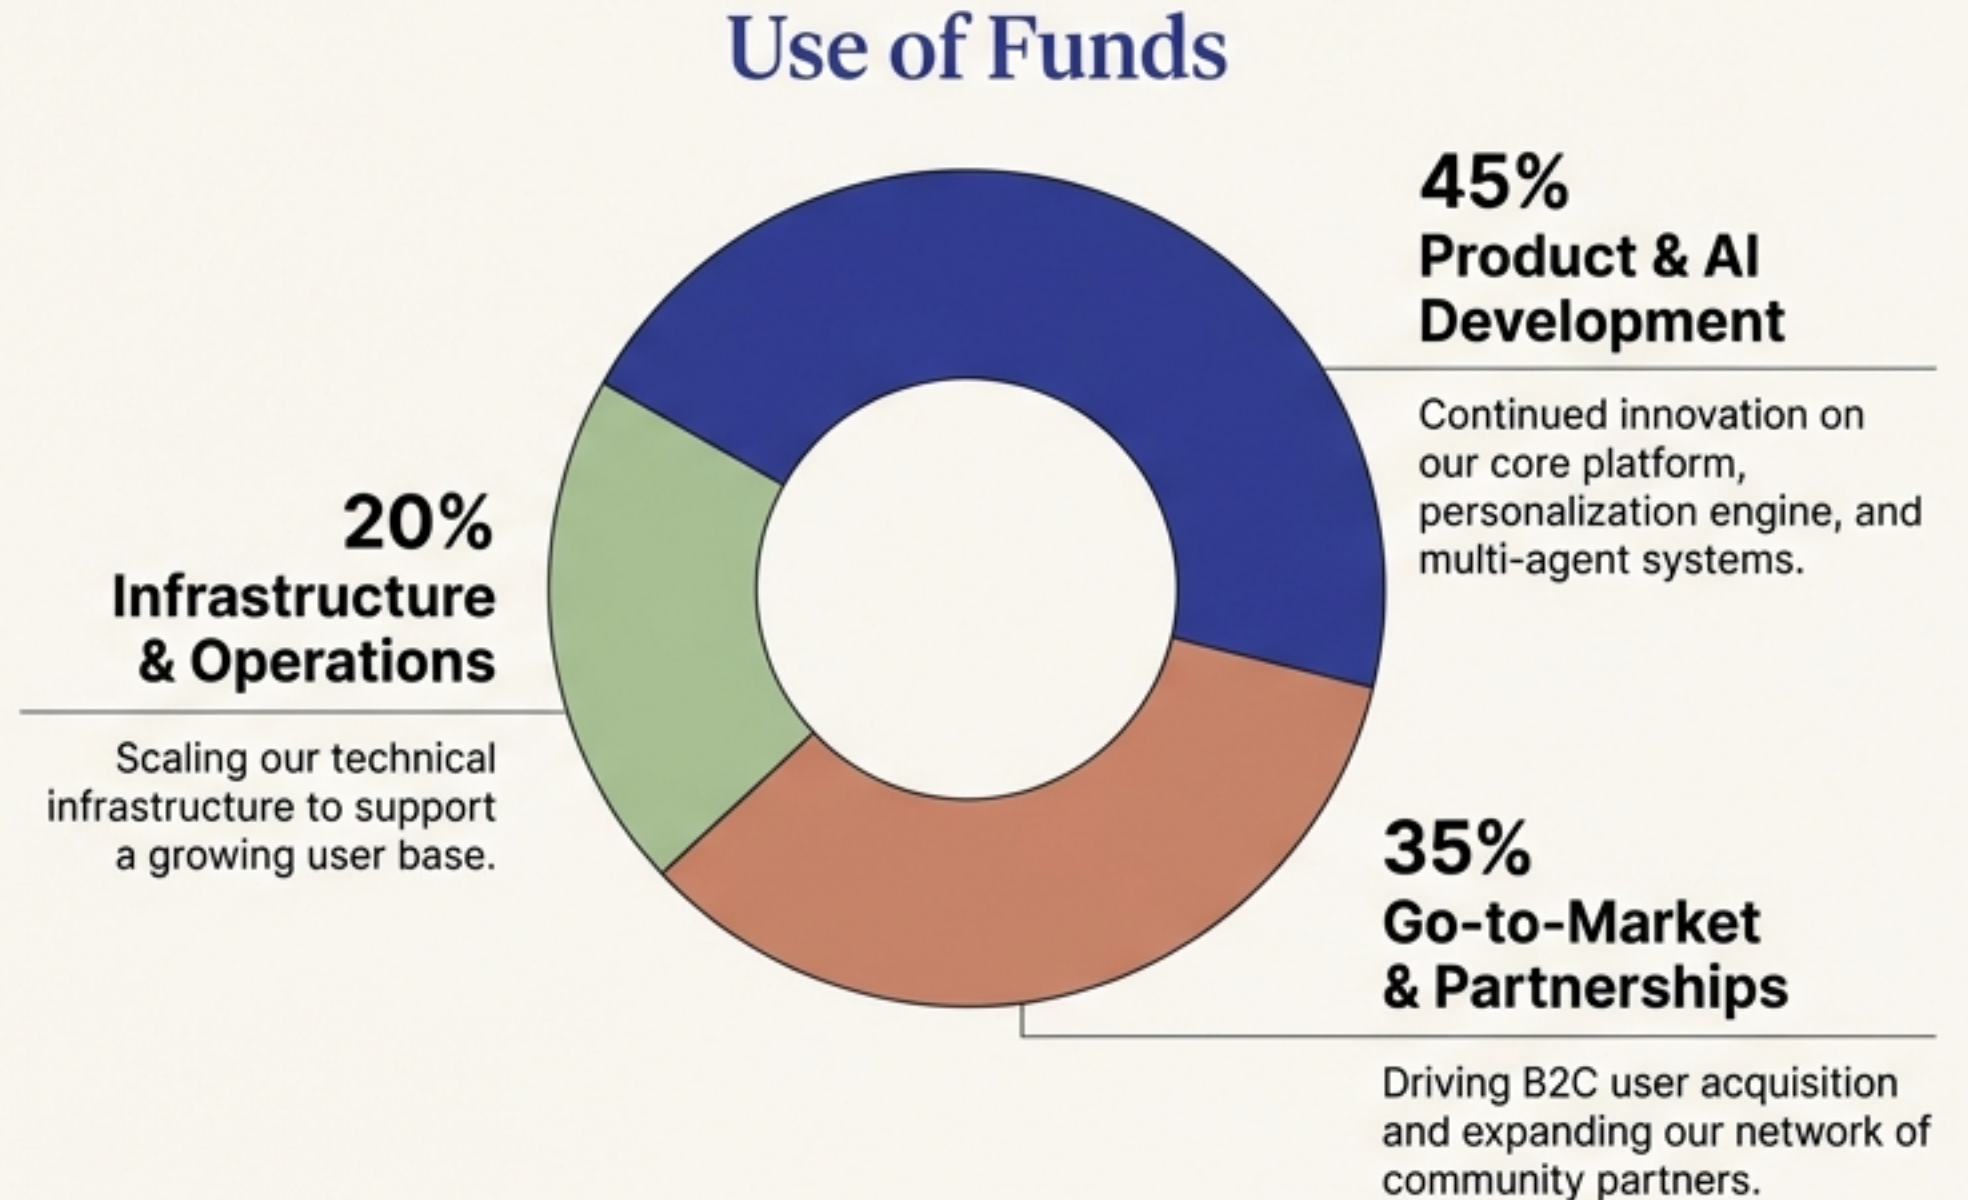

Phase 4: Months 10-12

Community Expansion

The Ask: Fueling the Next Generation of Learning.

We are raising a
€1.0M Seed Round.

This funding provides **18 to 24 months of runway** to execute our roadmap and achieve key growth milestones.

Key Outcomes of this Round: Reach commercial scale for B2C and expand community pilots to a network of 10+ sites.

The Future of Learning is Personalized, Assured, and Accessible.

Lumina AI is uniquely positioned to capture the shift towards personalized education. We combine a powerful, proprietary AI architecture with a validated, human-centric approach and a clear path to commercialization.

Vast Market:

Addressing the deep-seated engagement problem in online education.

Defensible Tech:

A multi-agent, structured-output system that is hard to replicate.

Early Traction:

Already live with partners, de-risking the technology and model.

Clear Roadmap & Ask:

A well-defined plan to deploy capital for maximum impact.

Join us in building the platform that unlocks the world's potential, one learner at a time.
